ABOUT ME

I have been working with development for just over 5 years and throughout this journey I have worked in all stages of the process of creating web systems. In recent years I have worked with frontend, backend development and UX Design, using tools such as: Figma, Nodejs, React.js, Google Cloud Platform and much more. These tools are commonly used in the insurance, blockchain, and financial sectors.

I am an intentional communicator and enthusiastic collaborator, comfortable leading and being led and eager to solve challenging problems.

WORK EXPERIENCE

Software developer

Grupo Zwela [18/04/2022 – Current]

City: Luanda | Country: Angola

As a **Software Developer** my responsibilities at Grupo Zwela include:

- **End-to-End Development:** Participating in the full lifecycle of web applications, from visual conception to implementation, using technologies like React.js, HTML, JavaScript, CSS, Node and Linux Server.
- **UX Design:** Assisting in creating intuitive and visually appealing interfaces using Figma, focusing on usability and user satisfaction.
- **Frontend Development:** Contributing to building responsive and dynamic interfaces with React.js, using libraries such as SASS, Chakra UI, Tailwind, Bootstrap, and Styled-Components.
- **Backend Development:** Supporting the design and implementation of scalable APIs and systems with Node.js, using architectures like REST and MVC, and libraries such as Express and Mongoose.
- **Management and Maintenance:** Performing continuous maintenance of websites and web applications, including content, hosting, domain, and user experience.
- **Technical Support for Digital Marketing:** Providing technical support for implementing digital marketing actions (landing pages, newsletters, etc.) and tracking metrics that affect traffic and conversions.
- **Deployment:** Assisting in deploying applications on platforms like Google Cloud Platform (GCP), Render, Heroku, Vercel, and Netlify, ensuring reliable and continuous delivery.
- **Version Control and Collaboration:** Using Git and methodologies like GitFlow, collaborating with distributed teams on GitHub.
- **Project Management:** Participating in project management with tools like Jira, Trello, and Notion, maintaining effective team communication through Slack.
- **Analysis of Statistical Indicators:** Assisting in analyzing statistical indicators and preparing reports from Google Analytics, proposing and monitoring the implementation of new market trends and updates.

Software developer

Bisc8 - Creative Studio [10/06/2023 – Current]

City: Luanda | Country: Angola

At **Bisc8**, a creative studio, I am responsible for developing and maintaining websites and web applications, as well as providing IT support. My role includes:

- Designing and implementing websites and web applications.
- Creating interactive games for various clients, including three notable projects for **Nossa Seguros**, showcased at the Luanda International Fair (FILDA): Memory Game, Who Wants to Be a Millionaire, and Word Search.
- Offering technical support and troubleshooting IT issues.

Technologies and tools frequently used:

- **WordPress**: Website creation and management.
- **JavaScript**: Programming and development of interactive features.
- **React**: Building dynamic user interfaces.
- **CSS and HTML**: Styling and structuring web pages.
- **Git and GitHub**: Version control and project collaboration.
- **Netlify and Vercel**: Deployment and hosting of web applications.
- **Linux Server**: Server management and hosting environment administration.

Frontend Developer

Buka [07/01/2021 – 12/01/2022]

City: Luanda | Country: Angola

It was a good experience to have spent in Buka. Buka is a startup whose core business is an online teaching platform. As a **Frontend Developer** my tasks revolved around:

- Development of responsive and dynamic user interfaces using React.js, Material UI and Sass, focusing on user experience and code efficiency.
- Successful implementation of new features, improving the usability and overall functionality of the product.
- Refactoring legacy code to improve maintainability and performance, following best development practices.
- Use of CSS-in-JS with Styled Components to ensure a consistent and modularized style throughout the application.
- Responsible for deployments on Heroku, managing the development and production environments to ensure a smooth and uninterrupted deployment.
- Collaborate with interdisciplinary teams to understand and implement business requirements, ensuring delivery of high-quality solutions on time.
- Efficient problem management and bug resolution, ensuring ongoing application stability and reliability

EDUCATION AND TRAINING

High School Diploma in Industrial Electronics and Automation

Benguela Polytechnic Institute [02/02/2015 – 10/12/2019]

City: Benguela | Country: Angola | Field(s) of study: Industrial Electronics and Automation | Final grade: 11,8 | Level in EQF: EQF level 3

I completed high school at the Polytechnic of Benguela, having studied industrial electronics and automation in the area of telecommunications. This course has great prominence in the following subjects:

- Electricity
- Electronics
- Computing
- Automation

Introduction to Computer Science

Harvard Online [04/02/2024 – Current]

City: Massachusetts (Remote) | Country: United States | Website: <https://www.edx.org/school/harvardx>

LANGUAGE SKILLS

Mother tongue(s): Portuguese

Other language(s):

English

LISTENING B2 **READING** B2 **WRITING** B2

SPOKEN PRODUCTION B2 **SPOKEN INTERACTION** B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DIGITAL SKILLS

HTML / JavaScript / CSS / SQL / React.js / JSON / MongoDB / Git / Express.js / Docker / Linux / Node.js / MySQL / Deployment on HEROKU / Deployment with Netlify, Vercel
